JENNIFER "JEN" MORGAN

FIBER ARTIST

(b. 1968, United States)

PERSONAL PROFILE

Jennifer Morgan is an emerging Louisiana-based fiber and mixed-media artist creating contemporary 2D felted artworks inspired by Louisiana’s culture and natural environment. Working in fiber, she is among a small number of artists worldwide who combine wet, Nuno, and needle felting within a single work to create contemporary portraits and vivid Louisiana wildlife imagery. With a BFA in Graphic Design, Morgan brings strong compositional structure and visual storytelling to her richly tactile, painterly surfaces. Her work translates regional narratives into bold, contemporary forms well suited for public and architectural spaces.
